

**WSL-1
ADVANCED FILTRATION TECHNOLOGY**

This WaterSentinel™ refrigerator water filter contains a compressed carbon block which provides tremendous capacity to remove and/or reduce impurities and sediment that may be present in drinking water. The carbon block has millions of active sites on its surface and within its structure which can absorb impurities like a sponge, and it can hold other types of impurities on its surface like a magnet. Additionally this filter can catalytically break down other impurities very similar to the way a catalytic converter works in your automobile. These processes ensure that you are getting the cleanest and best tasting water possible. This economical filter provides fresh and clean tasting water and ice cubes.

LG® Filters - LT-500P, 5231JA2002A

Guaranteed by WaterSentinel™

FILTER FEATURES:

- Economical alternative to expensive substitutes
- Delivers clean, clear water that looks and tastes great
- Will remove or reduce Chlorine, Tastes and Odors that may be present in drinking water
- Designed to provide up to six months of life or 300 gallons of filtered water
- Does not remove minerals which may be beneficial to health

This filter should not be used with water that is microbiologically unsafe or of unknown quality, without adequate disinfection before and /or after the filter.

All WaterSentinel™ filters are designed to meet or exceed the performance of the OEM filter it replaces.

This filter has been tested by the manufacturer against ANSI/NSF Standard 42 for the reduction of Chlorine, Tastes and Odors.
